

Stickbug Token Overview

Dated: September 1, 2024

Step into the Stickbug universe on Hedera, where ownership of the Stickbug token unlocks a realm filled with exclusive rewards. As a committed member of this community, you will not only enjoy camaraderie with fellow Stickbug enthusiasts but also benefit from monthly dividends sourced directly from our vesting account.

Stickbug represents a novel and captivating presence within the Hedera network, redefining digital asset investment. Stickbug is paired with stable tokens that have the potential to gain traction, thereby enhancing the token's overall stability. This approach provides users with broad exposure to the cryptocurrency market, anchored by the efficiency and scalability of the Hedera network. Stickbug aims to enhance the Hedera ecosystem by introducing utility through various strategic mechanisms, which we plan to continuously develop and announce. Stickbug distinguishes itself with a renounced contract, a limited supply of 10 million tokens, and zero transaction taxes. The token is further enhanced by utility NFTs and liquidity pools paired with Hedera's most formidable tokens, setting the stage for a new era of trading.

This document offers a detailed examination of Stickbug's features, use cases, and future potential, illustrating the project's vision and strategic direction.

Stickbug Strategy

Stickbug operates by combining the strengths of leading blue-chip cryptocurrencies recognized for their growth potential. Additionally, Stickbug plans to expand into several leading crypto chains to mitigate single-market risk while maintaining a primary focus on Hedera, the future of cryptocurrency.

At the core of Stickbug's strategy is a commitment to enhancing liquidity within its ecosystem, thereby fostering a thriving marketplace for traders and investors alike. By strategically managing liquidity pools and forming symbiotic partnerships, Stickbug aims to streamline trading activities and attract a diverse investor base.

Tokenomics Overview

- Token ID: 0.0.4352885
- Treasury Account: 0.0.4351585
- Token Symbol: stickbug
- Supply Type: Finite
- Max Supply: 10,000,000
- Initial Supply: 10,000,000
- Decimals: 4
- Tokens in Circulation: 4,982,403.354

The tokenomics model is designed to ensure a strategic allocation of tokens for liquidity, marketing, and controlled supply reduction. Detailed URLs provide transparency and access to real-time information regarding the token's lifecycle.

Liquidity Pool

- **Initial LP:** 1000 xSauce, completely burned
- **Burn URL:** [Burn URL](#)
- **Burn Address:** 0.0.3158042

Vesting

- **Initial Amount:** 1,049,110
- **Total Period:** Over one year (1/6/24 - 1/4/25), with token release every 14 days.
- **Utility:** Funding for NFT airdrop and marketing
- **Vesting URL:** [Vesting URL](#)
- **Vesting Address:** 0.0.4357916

Token Lock

- **Amount:** 1,073,300.965
- **Utility:** Funds are to be added to NFT liquidity; any excess is added to the vesting fund.
- **Lock URL:** [Lock URL](#)
- **Lock Address:** 0.0.2997798

Token Burn

- **Current Amount Burned:** 2,715,184.931
- **Burn URL:** [Burn URL](#)

Enhanced Roadmap

Q1 2024

- ✓ Token [Launch](#)
- ✓ Listing on [SaucerSwap](#)
- ✓ Sentinel [Audit](#)
- ✓ Published [Whitepaper](#)
- ✓ Creation of Discord [Community](#)

Q2 2024

- ✓ Twitter Verified [Community](#)
- ✓ Broke 40K [Liquidity](#)
- ✓ Creation of [Vesting Schedule](#)
- ✓ Listing on [Coingecko Terminal](#)

Q3 2024

- ✓ NFT [launch](#)
- ✓ Begin [Airdrop](#) to NFT holders

Q3 2024

- ✓ Partnership with blue-chip developers
- ✓ Listing on [C14](#)
- ✓ Listing on [Hashport](#)

Q4 + 2024

- 🗓 Stickbug DAO
- 🗓 NFT memorabilia launch
- 🗓 Governance NFT Launch
- 🗓 Listing on Crosschain DEX
- 🗓 SaucerSwap Farm
- 🗓 Partnership with major advertising platforms
- 🗓 Marketing On Crosschain
- 🗓 Exchange listings

This roadmap highlights our achievements and sets the stage for an inclusive, innovative future driven by our community and partnerships.

Team

- **Stickbug:** Co-founder and Lead Project Developer and Designer — An undoxed lead developer and NFT designer who blends groundbreaking blockchain technology with striking artistic talent. This pioneer crafts not just digital assets but immersive experiences, pushing the boundaries of what NFTs can be. Their work captivates and challenges, marrying code with creativity in the ever-evolving digital landscape. Step into the world they've created, where each Stickbug NFT is a testament to innovation and artistic exploration. A trailblazer in both development and design, they're shaping the future of digital art and blockchain, one Stickbug at a time.
- **"Post Master" Kyle Post:** Co-founder and Community Engagement Manager & Lead Hand — The dynamic community manager and athletic program creator for Stickbug. Kyle's expertise in fostering engaging communities and his passion for developing innovative athletic programs are at the heart of Stickbug's mission to inspire and connect. With a knack for understanding the pulse of the community and a vision for incorporating athleticism into the digital realm, Kyle is revolutionizing how we interact with digital spaces. His work is not just about building connections; it's about creating experiences that motivate, challenge, and unite us. Kyle Post is truly shaping a new era for Stickbug enthusiasts everywhere.

- **poncho.hbar (FUD SLAYER):** Dedicated Community Moderator — Introducing our dedicated community moderator for Stickbug, a linchpin in maintaining the vibrancy and positivity of our digital ecosystem. With an unwavering commitment to fostering an inclusive and engaging environment, they expertly navigate the dynamic world of online interactions, ensuring that every member feels valued and heard. Their role extends beyond moderation; it's about building connections, encouraging collaboration, and creating a space where passion for Stickbug thrives.

StickBug DAO

StickBug plans to undergo a significant transformation into a Decentralized Autonomous Organization (DAO) in the future. This transition will empower the community, turning StickBug enthusiasts into key decision-makers and contributors to the ecosystem's development.

The StickBug DAO will be the central platform for community decision-making, reflecting our commitment to decentralization. We will introduce exclusive Voting NFTs, which will enable holders to exercise voting rights on important proposals, upgrades, and initiatives within the StickBug DAO. These NFTs will be distributed to our most engaged community members, rewarding their dedication and encouraging active participation in governance. During the transition period the Stickbug founders will retain a 50% voting share which will then be decreased over a period of 9 months to 35%.

Holders of these Voting NFTs will have the privilege of shaping the future of StickBug DAO, ensuring that the project's direction aligns with the community's collective vision.

Stickbug Flagship NFT Collection

The Stickbug NFT Collection is at the forefront of the NFT revolution, offering a unique blend of artistic creativity, rarity, and practical benefits. With only 430 NFTs minted, the collection provides holders with monthly earnings from various sources, including transaction fees and a dedicated liquidity pool.

Each Stickbug NFT is more than just digital art; it's a passport to ongoing rewards and a stake in the collection's ecosystem. Priced initially at 200 HBAR, the collection ensures exclusivity and value, offering a premium experience to its holders. We plan to continuously update rewards for users to continue to hold our namesake NFT.

Fighterbug Flawless NFT Collection

The Fighterbug Flawless NFT collection leverages cutting-edge hashinal technology to inscribe images directly into the Hedera Hashgraph protocol. These dynamic NFTs evolve with fighters, allowing them to update their stats over time. Launched in partnership with Sentx and Karate Combat's open IP licensing, **the project celebrates and rewards fighters, with 60% of sales going directly to them.** Additionally, 20% supports the Stickbug project for further NFT

enhancements and marketing, while 20% goes to the founders. Fighters can customize their NFTs and link them to their social media, ensuring ongoing engagement and revenue through royalties. This collection represents the most advanced NFTs on Hedera, with continuous development planned. *To read more about this NFT check out our [Fighterbug Flawless Whitepaper](#)*
